Name: Vector Boot	Code: 21115	MB23 FOOTWEAR MAXIMUM SERIES
--------------------------	--------------------	-------------------------------------

Description

High footwear with laces, made with Nabuk leather upper with Cordura ankle band and composite midsole, with a constant thickness of 4 mm. The PU/rubber outsole is made, on the inner part, of wide cell polyurethane with high memory effect to favour cushioning and avoid shocks. The nitrile rubber tread has a pronounced two-tone tread pattern and is resistant to hydrocarbons and slip resistance in wet conditions. The red inserts with a higher density and hardness give the sole anti-twisting characteristics and make it suitable for gravelly, rocky or irregular environments.

The footbed, in monolithic material, is made from the union of EVA and RUBBER with variable thickness: 5 mm in the front part and 10 mm in the heel area. Suitable exclusively for Maximum series footwear. Antistatic. The lining in Thinsulate fabric has a very high insulation from the cold, with a minimum thickness.

Main features:

- Wide fit
- Ideal in the presence of hydrocarbons and chemical substances
- The characteristics of the two-component sole favour cushioning and avoid shocks.
- The nitrile rubber tread is resistant to hydrocarbons and wet slip.
- The higher density and hardness inserts give anti-twisting characteristics.
- High Durability Cap System: high durability TPU tip system
- I don for gravelly, rocky or irregular environments

The product has been designed and manufactured to comply with Regulation (EU) 2016/425 and subsequent amendments and in such a way as to comply with the requirements of standard EN 20345 EC. and is classified as Category II PPE.

Category II	Colours Black	Available Sizes 39-47
